EDUCATION

National Engineering Degree in Telecommunications — High Honors

Sep 2023 - Jul 2026

Higher School of Communication Tunis, SUP'COM

Preparatory Cycle in Mathematics and Physics (MP)

Sep 2021 - Jul 2023

Preparatory Institute for Engineering Studies in Sfax, Tunisia

- Ranked 141st out of 1,750 candidates in the National Engineering Entrance Examination

Mathematics Baccalaureate — High Honors

Sep 2020 - Jul 2021

Fadhel Ben Achour Secondary School, Sfax, Tunisia

PROFESSIONAL EXPERIENCE

Convery for E-Commerce

Software Engineer

Jun 2026 - Present

- Designed an AI-powered product import pipeline using breadth-first search (BFS) and Gemini to extract and structure product data (titles, images, pricing, variants) from external storefronts, supporting both single-product imports and full-store catalog migrations
- Developing the Node.js and Python backend services and a React admin interface that let sellers review and confirm imported product data before publication
- Designed and implemented the end-to-end import workflow and deployed it to the staging environment for validation ahead of production rollout
- Technologies:** React, Tailwind CSS, Node.js, Python, Gemini

PFE Intern, Full-Stack Development

Jan - May 2026

- Developed and deployed a Node.js/TypeScript payment microservice to production on Kubernetes, integrating Flouci, ClicToPay, Stripe, and PayPal behind a unified, extensible payment interface
- Implemented idempotency, retry handling, and automated payment reconciliation in an event-driven pipeline (RabbitMQ, Redis, MongoDB) to ensure reliable payment processing
- Integrated the payment service with React and Go components and managed its delivery through CI/CD, from staging validation to production deployment
- Technologies:** Node.js, TypeScript, Go, React, MongoDB, RabbitMQ, Kubernetes, GitHub Actions

Supervised Project

Sep - Dec 2025

- Designed the architecture of a landing-page creation platform for product showcases, supporting drag-and-drop editing and real-time content updates
- Technologies:** React, Next.js

Telnet Inc

DevOps Intern

Jul - Aug 2025

- Implemented a CI/CD pipeline using Jenkins to automate application builds, testing, and Docker integration, and deployed images to Docker Hub for centralized, secure distribution

Full Stack Developer Intern

Jul - Aug 2024

- Developed a web application for Agile sprint performance tracking, integrating Jira REST APIs to retrieve and visualize metrics including sprint velocity and delivery rate
- Technologies:** Spring Boot, Angular, Chart.js, PostgreSQL

PROJECTS

Full Stack Project | E-learning Platform with AI Chatbot

Jan - May 2025

- Developed a full-stack e-learning platform with separate instructor, participant, and administrator roles
- Implemented course and training management features with JWT-based authentication and role-based authorization
- Integrated a Gemini-powered chatbot to provide educational assistance and track user sessions
- Technologies:** Angular, Spring Boot, PostgreSQL, Gemini

ADDITIONAL INFORMATION

- Languages & Backend:** Python, TypeScript/JavaScript, Java, Node.js, Express, Spring Boot, REST APIs
- Frontend:** React, Next.js, Angular, Tailwind CSS
- Data & Messaging:** MongoDB, PostgreSQL, RabbitMQ, Redis
- DevOps & Cloud:** Docker, Kubernetes, GitHub Actions, Jenkins, Git & GitHub, GCP
- AI/LLM:** Gemini API integration, prompt-based extraction pipelines
- Soft Skills:** Problem-solving, teamwork, communication, critical thinking
- Languages:** Arabic (Native), English (B2), French (B2), Spanish (A1/A2)
- Activities:** Vice President – Leading SUP'COM, Vice President – NATEG
- Interests:** Project Management, Chess
